Nalgonda, Telangana, India | +91 96523 78004 | anuguvaishnavireddy2@gmail.com | github.com/vaishnavireddy067 | linkedin.com/in/anugu-vaishnavi-651a67353

CAREER OBJECTIVE

B.Tech undergraduate in Artificial Intelligence & Data Science (2027) with hands-on experience spanning Generative AI, Agentic AI, and full-stack web development. Skilled in LLMs, prompting, embeddings, RAG, and vector databases, with practical exposure to building AI agents and agent workflows using LangChain and Groq/Llama. Proficient in Python, JavaScript, and SQL, with working experience across data preprocessing/analysis, and production-oriented systems using FastAPI, Flask, and React.js. Seeking a role — in Generative AI/Agentic AI engineering, Data Analysis, or Full Stack development — where these skills can drive real-world impact.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java (Intermediate), C (Intermediate)

AI / ML & LLM Engineering: Machine Learning – fundamentals; Generative AI – LLMs, Prompting, Embeddings, RAG, Vector Databases; Agentic AI – AI Agents, Tool Calling, Agent Workflows, LangChain, Groq + Llama; FAISS, Pinecone

Data Analysis: Data Preprocessing, EDA, Feature Engineering, Python for Data Analysis, Excel

Frontend Development: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Responsive UI Design

Backend & Deployment: FastAPI, Flask, Express, REST API Design, Vercel, Render, Streamlit

Data Management: MySQL, PostgreSQL, MongoDB, DBMS

Visualization & BI: Power BI, Tableau

Core CS & Tools: Data Structures & Algorithms, Git, GitHub, VS Code, Postman, OpenCV, Google Colab, Agile/Scrum

EXPERIENCE

AI Backend Engineer Intern / *FlyRank*

Jul 2026 – 15 Aug 2026 | Remote

- Designed scalable backend APIs integrating AI/ML pipelines (Computer Vision, NLP, Agentic AI, Voice AI) into production-ready applications, collaborating with global cross-functional teams.

AI Automation & Intelligent Solutions Intern / *IBM SkillsBuild (BharatCares)*

22 Jun – 31 Jul 2026 | Remote

- Completed a 6-week internship on AI automation and intelligent solutions, in association with BharatCares and AICTE (Certificate ID: BHIBMAC11845).

AI Engineer Intern / *Coding Blocks School of Technology*

Jun – Jul 2026 | Remote

- Trained and evaluated ML models for applied AI tasks, embedding LLM and GenAI APIs into application workflows through structured debugging and implementation.

Artificial Intelligence Intern / *Viswam.ai (SoAI)*

Jun – Aug 2024 | Hybrid

- Cleaned and validated 5,000+ real-world records using Python (Pandas, NumPy), cutting data-preparation time by approximately 30% through systematic feature engineering.

KEY PROJECTS

Research-Orbit – Autonomous Research Assistant (RAG Pipeline) [Python, LangChain, ChromaDB, FAISS, LLM APIs, Streamlit]

- Built a RAG pipeline over research documents using vector databases (ChromaDB/FAISS) for semantic search, reducing literature-review time by 60% through optimized prompt engineering.

AI CareMatch – Trust-Based Caregiver Intelligence Platform [React.js, Firebase, OpenAI GPT-4o, FastAPI, Twilio]

- Built a full-stack caregiver-matching platform (React.js, Firebase) with GPT-4o-powered natural language and voice search, delivering explainable recommendations via a 6-dimension matching engine deployed on FastAPI.

Adaptive Learning Management & Smart Campus System [Python, LLM APIs, Streamlit, SQL, ERP Integration]

- Engineered a personalized learning-path recommendation engine using collaborative filtering and LLM-driven content generation, improving student engagement by 35% and unifying LMS/ERP analytics into predictive dashboards.

Smart Routing System [Python, Jupyter Notebook, Graph Algorithms, ML]

- Built a Google Maps-inspired routing system using graph algorithms and machine learning to dynamically optimize routes based on predicted traffic.

Student Performance Prediction & Analysis [Python, Pandas, NumPy, Scikit-learn]

- Applied correlation and regression techniques to a behavioral dataset, achieving an 89% F1 score on the predictive classification model.

IrisXplain AI – Multi-Model Data Analysis & Prediction Dashboard *[Python, Scikit-learn, SHAP, LIME]*

- Built a comparison dashboard for six ML models with accuracy, F1, and ROC-AUC metrics, plus SHAP/LIME explainability.

HR Resume Screening Pipeline *[Python, NLP, TF-IDF, Scikit-learn]*

- Structured 5,000+ labelled resumes into an end-to-end NLP analysis pipeline, cutting manual processing time by 70%.

Air Drawing – Real-Time Gesture-Controlled Drawing App *[Python, OpenCV, MediaPipe, Multithreading]*

- Built a real-time, gesture-controlled drawing app with a multithreaded backend processing live video streams at under 50ms latency.

ZenTodo – Smart Productivity Task Manager *[HTML, CSS, JavaScript]*

- Built a minimalist task manager with a glassmorphic UI, dark mode, categories, priorities, due dates, and real-time search.

EDUCATION

B.Tech, Artificial Intelligence & Data Science — AVN Institute of Engineering & Technology, Hyderabad **2023 – 2027 | GPA: 8.72**

Intermediate (MPC) — Pragati Junior College, Nalgonda **2021 – 2023 | 885**

SSC — MVR High School, Nalgonda **2021 | 100%**

CERTIFICATIONS

- IBM SkillsBuild – AI Automation & Intelligent Solutions Internship (BharatCares, in association with AICTE) — Certificate ID: BHIBMAC11845
- Generative AI Workshop — IBM
- Artificial Intelligence Fundamentals — IBM
- Machine Learning — Innomatics Research Labs
- Exploratory Data Analysis using Power BI — SkillEcted
- Web Development — Codec Technologies (Credly Verified)
- Frontend Development — Elite Coders

ACHIEVEMENTS

- Winner — GenAI Forge Hackathon, Nasscom (January 2026).

ACTIVITIES

- Participated in multiple hackathons, applying technical skills under time-bound, competitive settings.
- Volunteered and coordinated at college technical events, managing logistics and team coordination.
- Attended multiple workshops organized by communities who are professionals.
