CAREER OBJECTIVE

B.Tech undergraduate in Computer Science (AI & Data Science specialization), graduating 2027, with strong programming fundamentals in Python, Java, and C, and a solid foundation in Data Structures & Algorithms, Object-Oriented Programming, and Operating Systems. Has independently designed and shipped multiple end-to-end software systems spanning full-stack web applications, backend services, and AI-integrated platforms, with a first-place win at the GenAI Forge Hackathon (Nasscom). Strong problem-solving ability, comfortable working across the full SDLC, and eager to contribute as a Software Development Engineer Intern while continuing to grow through real-world engineering challenges.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOPs), Operating Systems (OS), System Design, Computer Networks (CN)
- **Backend Development:** Flask, FastAPI, REST API Design, Firebase Auth & Firestore, Node.js (build tooling)
- **Data Management:** SQL (MySQL, PostgreSQL, SQLite), MongoDB, DBMS, Data Modeling, Cleaning & Preprocessing, Validation, ETL, Analytics, Python for Analysis
- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI Design, Bootstrap
- **Tools & Practices:** Git, GitHub, VS Code, Postman, Agile/Scrum, SDLC, Debugging & Testing
- **AI/ML:** Machine Learning, GenAI, Agentic AI, RAG, LLM's, AI Agents, TensorFlow, PyTorch, AI Orchestration Flow
- **Additional Skills:** Software Development, Coding, Unit Testing, Technical Documentation, System Integration, Solution Implementation, AI Tools, Waterfall, Design Patterns, Testing Frameworks, APIs, Data Interfaces, Software Quality Assurance, Collaboration, Problem Solving, Ownership, Time Management, Continuous Learning

INTERNSHIP EXPERIENCE

AI Backend Engineer Intern | *FlyRank* *Jul 2026 – Present | Remote*

- Building backend services and APIs that power AI-driven features, working across applied areas including computer vision, NLP, agentic AI, and voice AI.
- Contributing to full-stack AI application development, integrating backend logic with AI/ML pipelines for production-ready features.

AI Automation and Intelligence Intern | *IBM CSR BharatCares* *Jul 2026 – Aug 2026 | Remote*

- Contributed to an AI-driven automation and intelligence system for the BharatCares CSR platform, streamlining manual workflows and reducing repetitive operational tasks.
- Worked on integrating AI-based automation modules with existing systems, supporting data-driven monitoring and reporting for CSR program operations.

AI Engineer Intern | *Coding Blocks School of Technology* *Jun 2026 – Jul 2026 | Remote*

- Built and trained machine learning models for applied AI tasks, covering data preprocessing, training, and evaluation.
- Worked on GenAI and LLM-powered features, integrating language model APIs into application workflows.
- Contributed to backend systems connecting AI components with application logic through REST APIs.

Artificial Intelligence Intern | *Viswam.ai (SoAI)* *Jun 2024 – Aug 2024 | Hybrid*

- Cleaned and structured large real-world datasets using Python (Pandas, NumPy), reducing data-preparation time by approximately 30%.
- Performed data validation, feature engineering, and quality checks to produce accurate, analysis-ready datasets for downstream modeling.

KEY PROJECTS

AI CareMatch – Full-Stack Web Platform *[React.js, Firebase (Auth/Firestore/Cloud Functions), REST APIs, Node.js]*

- Built a full-stack single-page application with a React.js frontend and Firebase backend, powering a 6-dimension recommendation engine that draws from multiple data sources.
- Designed secure Firestore schemas and authentication workflows, and implemented Cloud Functions as a server-side API layer supporting the recommendation engine.

Adaptive Learning Management & Smart Campus System *[Python, SQL, ERP Integration]*

- Engineered a web platform unifying student performance, attendance, and academic records from multiple sources into a single dashboard.
- Created well-defined data pipelines and reporting views to support performance forecasting and student engagement tracking.

HireMind AI – Agentic Talent Intelligence Platform *[LangGraph, LangChain, Gemini, FastAPI, React, FAISS]*

- Built an agentic AI recruitment platform that automates resume screening, skill matching, coding assessment, interview generation, and hiring recommendations using collaborative AI agents.
- Used FAISS-based vector search for candidate-role matching, orchestrating multi-agent workflows with LangGraph and LangChain, powered by Gemini.

EDUCATION

B.Tech – Artificial Intelligence & Data Science, AVN Institute of Engineering & Technology, Hyderabad *2023 – 2027 | 85% | CGPA: 8.72*

Intermediate (MPC), Pragati Junior College, Nalgonda *2021 – 2023 | 88.5%*

SSC, MVR High School, Nalgonda *2021 | 100%*

CERTIFICATIONS

- Web Development — Codec Technologies (Credly Verified) | Frontend Development — Elite Coders
- Artificial Intelligence Fundamentals — IBM | Machine Learning — Innomatics Research Labs

ACHIEVEMENTS

- Winner — GenAI Forge Hackathon, Nasscom (January 2026).
